

Smooth shoulders and forearms

Not enough e legs. Hands women also have to be velvet. Especially brunets tired with too haired arms. Unfortunately, if you want to have smooth hands, we must carefully choose how to hair removal. After-shave Italian very quickly (after about 2 days), and their terminations are hard and darker. It is an electric epilator can irritate the skin.

What is best depilate hands?

The best way depilatory agents (creams, milk)

Advantages: easy to use, painless and quick method.

Disadvantages: Italian quickly, improperly selected preparations are likely to anger the skin.

Other options: shave, wax, epilator

Chemical depilatory remove hair at the skin, or simply "shave" without the use of shavers. But Italian are not as hard and after-shave.

Once creams or foams have to stick to the skin for at least quarter. Today, this method of hair removal are sufficient 3 minutes! In modern chemical depilatories is not it almost felt their "chemical" odor, it is masked flavorings. The creams that Substances Mitigation and soothing cuticle (honey, extract of aloe, avocados, yoyoba).

Using chemical depilatory, follow the manufacturer's recommendations, especially not the time hair removal (always given in the leaflet). The action of the chemical is dissolved on the hairs all the way to their base. In order to not irritate the skin cream or milk after a certain period of time must be carefully removed with the hair. Is used for that special plastic spatulas or sponges attached to the package.
